V2 – 2021

# בנייה

# Introduction

---

## DeHub

### The Decentralized Entertainment Hub

DeHub, the world's first entertainment aggregator & producer of original motion picture and gaming experiences.

From gaming to streaming, DeHub streamlines user experience in a continuously enhancing ecosystem of endless barrier free and censorship resistant entertainment.

Users can engage in a number of ways directly on our D'app using their \$DeHub tokens while our aggregators allow users to earn multiple tokens simultaneously, greatly increasing exposure to a number of entertainment apps both on and off chain.

# Project Overview

---

The DeHub D'app will consist of two core branches which affirm our offering as a true end-to-end entertainment aggregator

- **DeHub Tournetopia** - Gaming and betting platform
- **DeHub Live** - Streaming aggregator and original productions/Pay-per-view (PPV) platform

## 1) DeHub Tournetopia

Play a collection of classic arcade, betting and casino games. Enter Tournetopia Mode to challenge any player at any multiplayer game.

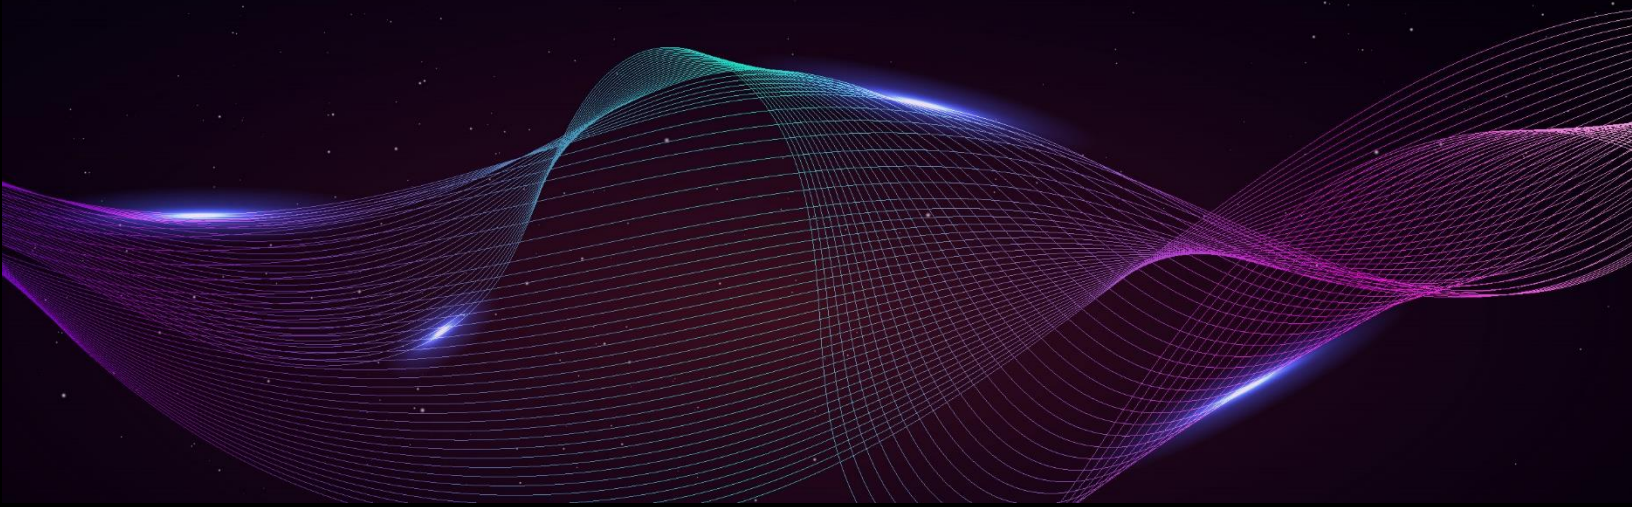

**Competitive games** - Play a broad variety of games (such as 8 ball pool, bowling, chess, checkers and more) with family and friends or compete against other players with a stake on the line and the winner taking it all.

**Single player games** - Test your luck playing mini games including price predictions, coin toss, spin wheel and scratchers.

**Lottery** - Take part in the daily lottery to win lucrative prizes, or bet against the odds and join our massive periodic lotteries to win a life-changing grand pot.

**Casino** - Join our DeHub Casino to gamble in a wide variety of games including poker, blackjack, roulette and slot machines.

**Betting** - Pick your favorite side and bet on sport competitions such as MMA, boxing, soccer, basketball, etc.

# Project Overview

---

**Tournaments** - Participate in DeHub gaming tournaments for in-house games as well as famous games on multiple platforms (PC/PS/Xbox) such as Fifa, League of Legends, Counter Strike, Call of Duty & many more.

**Developers** - Become part of the DeHub family and get your developed games featured on our D'app and earn a passive income from players' buy-ins.

## 2) DeHub Live

Access streaming content available on crypto and legacy video and audio streaming platforms such as Theta and YouTube in one place via a single search bar. There will be an emphasis on content relating to crypto finance and education.

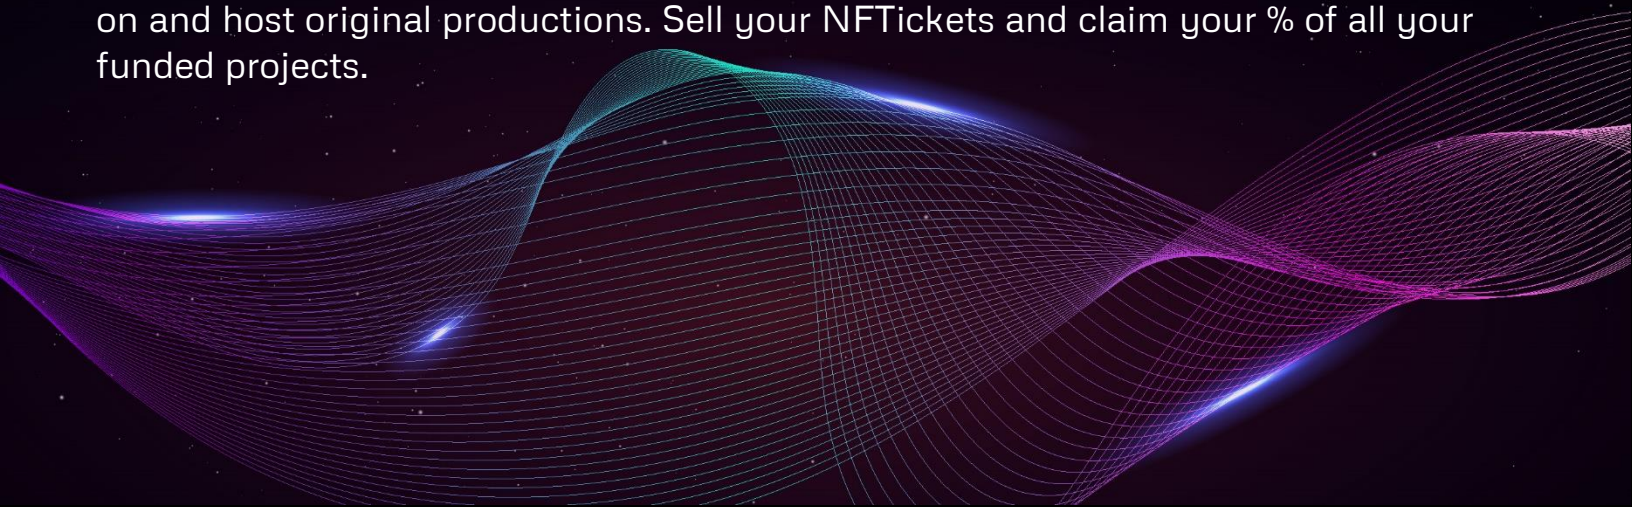

**Stream** - Access live content from global sources including live TV, movies, series, documentaries and PPV events in one search bar without ads.

**Create** - Artists, film makers, live streamers and others can use our platform to post their videos and get paid in \$DeHub. Creatives can also engage directly with viewers and fans on D'app.

**Fund** - Vote on who receives funding for the next DeHub Original, or fund creators directly and earn a % of their NFTicket sales for release in our VR Cinemas or direct on D'app.

**Review & Award** - Participate in uncensored, blockchain-verified reviews and awards voting. The annual Diamond Hands Awards are the worlds' first decentralized and fairly-selected entertainment awards.

**DeHub Original Productions & PPV** - Putting the power back in the viewers' and creators' hands while fully removing all censorship or conformity. Watch, fund, vote on and host original productions. Sell your NFTickets and claim your % of all your funded projects.

# About the Token

---

## \$DEHUB Token

The \$DeHub token fully leverages the latest and most cutting - edge of block chain technologies, reinforced by new features combining all that is wonderful in the crypto world via unforked and unique code created by our in-house R&D team.

The DeHub D'app and ecosystem will be governed and supported by our native \$DeHub token. \$DeHub tokens will be used for both utility and governance.

\$DeHub tokens will be initially minted as BEP20 Tokens on the Binance Smart Chain allowing viewers, gamers, creators, collectors, fans, and traders to engage on an ultra-fast and low-cost network.

## \$DEHUB Utility

**Currency** - All D'app transactions including payments for PPV events, NFT Tickets, game buy-ins, betting wagers, lottery tickets and tournament fees, will be made using \$DeHub tokens exclusively. Similarly, all prizes and pay-outs will be paid using \$DeHub Tokens exclusively.

**Governance** - Token holding accounts will be able to suggest and vote on operational decisions as well as vote on original productions funding, renewals and cancellations.

**Drop Stream** - Holding \$DEHUB earns a steady flow of ultra-rare drops of our own exclusive original productions as well as partnership drops with industry icons, stars and legends in art, film and culture.

# About the Token

---

## We call it “Trikenomics”

\$DeHub is jam-packed with new features such as \$DeHub token reflection, collateral asset rewards and a buy-back system. In addition, dynamically pegged auto-liquidity generation along with anti-snipe and anti-bot features will reward token holders and long-term stakeholders who believe in the DeHub vision, mission and project. Combined, these bespoke Trikenomics ensure an ever-rising price floor and value, decisively limiting hostile whales, bots and manipulators by severely controlling price dumps and selloffs. At the same time these measures do not target ordinary traders.

## “Trikenomics” Protocol

The \$DeHub Protocol includes 3 main features: token reflections to all holders, buy-back system (we call it the Robinhood System) and crypto collateral asset rewards to be claimed by holders from our rewards D'app.

### 12% Transaction fee distribution:

- 2% Liquidity pool
- 1% \$DeHub reflections to all holders including dead wallet
- 1% \$DeHub reflections to marketing & operations wallet
- 4% Buyback wallet (**Robinhood System**)
- 2% BNB distributed to all holders
- 2% Collateral assets to utilize as project bridging onto other blockchains, project reserves, milestone rewards, etc...

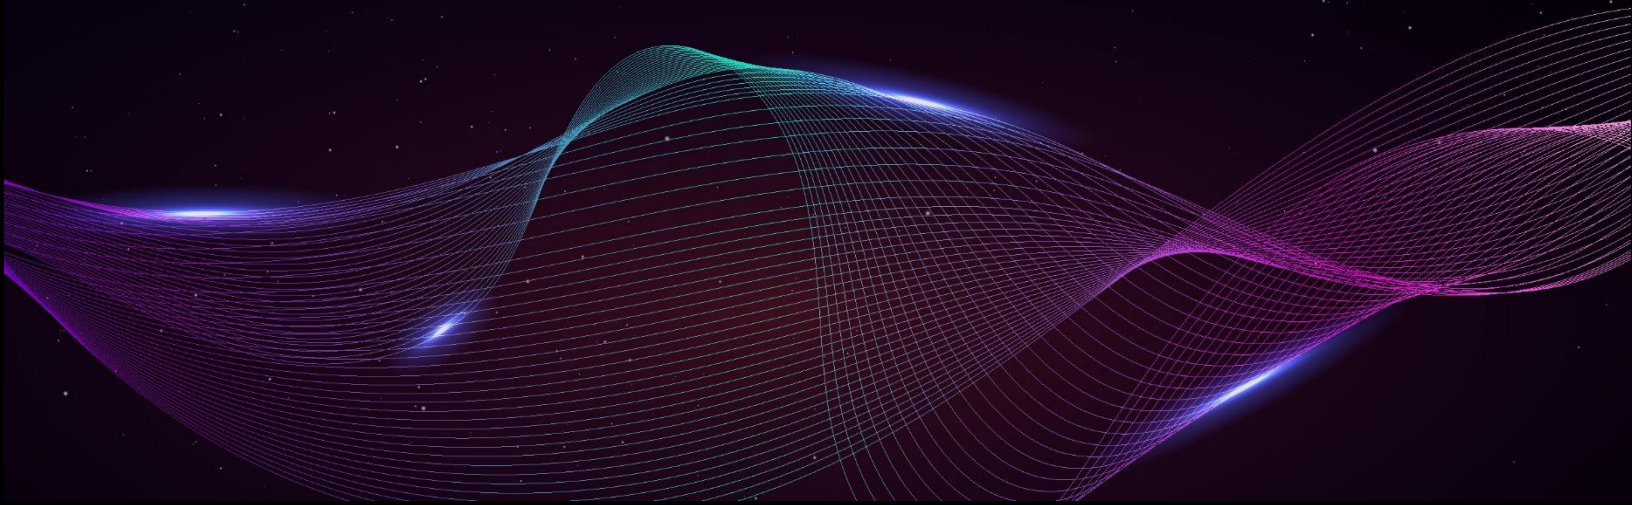

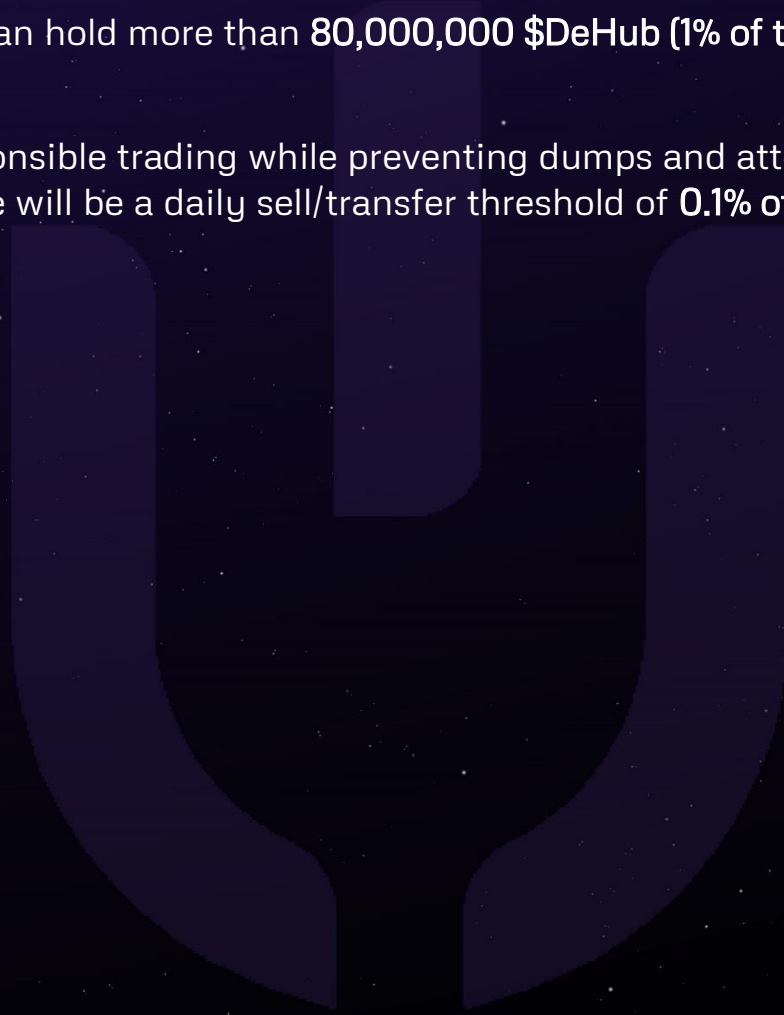

# About the Token

---

## Fair Trading Measures

No private wallet can hold more than **80,000,000 \$DeHub** (1% of the total supply) at any given time.

To encourage responsible trading while preventing dumps and attempted market manipulation, there will be a daily sell/transfer threshold of **0.1% of circulating supply per wallet**.

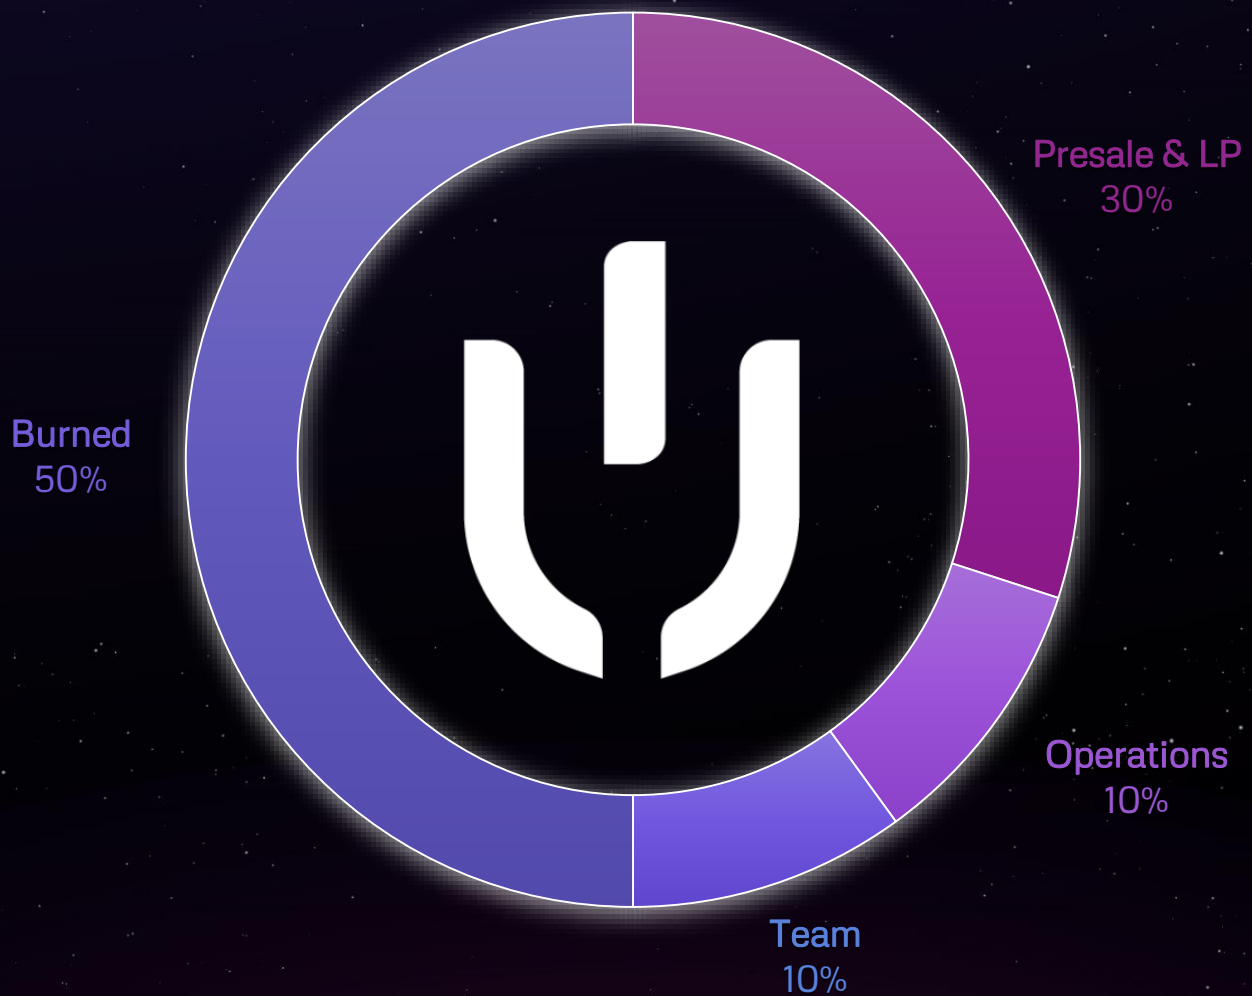

# Token Distribution

---

Users will be able to obtain \$DeHub tokens during our Public Sale event, with the initial distribution as follows.

**Total Supply 8,000,000,000 DEHUB Tokens**

# Token Distribution

---

## Presale + Liquidity Pool

30% of the total supply is allocated to presale and liquidity pool.

Private sale rate: 0.001\$ / DeHub

Launchpad rate: 0.00135\$ / DeHub

Listing rate: 0.0015\$ / DeHub

Note: LP locked for 3 years.

## Burned Wallet

The DeHub Burned Wallet will receive its share from the 1% reflections in a process that slowly removes tokens from circulation thus increasing the value of the remaining tokens.

## Team Wallet

The DeHub Team Wallet contains funds reserved for founders who initially funded and started the project. No wallet can sell below their percentage allocation and only the reflections will be tradable for the first 4 years.

# Token Distribution

---

## Operations & Marketing Wallet

10% of the total supply will be allocated to fund the following:

- 1- Marketing: Ongoing marketing campaigns, influencers and in-house marketing experts, social media moderators and designers.
- 2- Research & Development: Ongoing updates to the website and D'app including a schedule of enhancements to the user experience via new features to be launched on a monthly basis.
- 3- Partnerships and Licensing: Secure the biggest and best releases and rights such as major MMA and Boxing events.

## Token Dilution Model

All team and centrally-controlled wallets can technically be regarded as burned because we can only liquidate reflections for at least the first 4 years.

# Roadmap

---

Q3 2021

## DeHub Launching

Branding (July) - Done  
Website Development (July) - Done  
Smart Contract Development & Testing (July) - Done  
Smart Contract Audit by Techrate (July/August) - Done  
Setup Social Media Pages (July) - Done  
Release Lite Paper (July) - Done  
Social Media Content Creation (Continuous) - Ongoing  
Marketing Campaign (Continuous) - Ongoing

Private Sale (August) - Done  
Presale (August) - Ongoing  
Whitepaper V1 (August) - Done  
Pancakeswap Listing (August)  
CMC & Coingecko Applications (August)  
Release New Website (August) - Done  
Launch Rewards Claiming D'app (August) - Done  
Launch Beta Tournetopia D'app Platform (August)  
Launch Lottery & Mega Raffles (August)
